DIA review(s) completed.

Notes on DIA Reorganization

1. It has been difficult to get a handle on the real significance of the DI/DIA reorganization. DIA personnel themselves report that it is "just another attempt to make this outfit work better. In any event a preliminary survey of the new structure indicates that it will have very little impact on working relationships with the research divisions in CIA. Our analysts will be dealing with the same people as before. Office Directors, however, may be able to establish meaningful relations at the new ADDI level.

2. It must be noted that this reorganization only touches General Faurer's Directorate, but does not affect either DIA's economists or estimators. It appears that it is an attempt to streamline an unwieldy vertical organization. For example, General Faurer now has three Assistant Deputy Directors reporting to him rather than the eight division chiefs that were directly responsible to him under the old organization.

3. There does appear to be a greater centralization of the current intelligence and alerting function--probably to the benefit of OSR/RAD and OCI. All NID and NIB items will be prepared in DIN-2, and if the chief of this unit is given any authority, coordination problems should be easier to resolve. Unfortunately all the editors and the publication processors are located in a different division, DIN-1.

4. The reorganization does not change the DIA PI shop structure other than giving it a new number--i.e., DI-8 becomes DIR-5. There are reports of another reorganization, however, that will bear directly on the PI shop. Details are not known at this time.

5. RAD has prepared a graphic of the new structure--see attachments.

DI DIRECTORATE FOR INTELLIGENCE
Deputy Director for Intelligence, Major General Faurer

DIN National Military Intelligence Center
Assistant to the Deputy Director for
the National Military Intelligence Center, RADM Robertson

DIN-1 Operations Support Division

- assess US reconnaissance missions
- support alternate control centers
- deliver briefing on current intelligence
- coordinate and evaluate DOD indications and warning system

DIN-2 Analytic Support Division

- research, evaluate, and publish current intelligence

DIN-A Alert Teams

DIR Defense Intelligence Research Center
Assistant to the Deputy Director for
the Defense Intelligence Research Center, Dr. Edward Collins

DIR-1 Soviet/Warsaw Pact Division

DIR-2 Eastern Division (includes southeast Asia)

DIR-3 Western Division

- produce term intelligence on military capabilities and logistics (except for S&T subjects)

DIR-4 Resources and Installations Division

- produce intelligence for targeting, physical vulnerability analysis, military geography, military economics, energy, and military material production
- support US POW/MIA problem

DIR-5 Imagery Analysis Division

- support imagery interpretation needs of DIR and DIN

DID Management and Development
Assistant to the Deputy Director for
Management and Development, Mr. James Agersborg

DID-1A Applications and Planning Branch

- conduct long-range planning
- identify, develop and monitor ADP support for DIN and DIR
- NMIC modernization program

DID-1B Resources Branch

- manage personnel, financial, contract, and reserve support resources for DI

DID-1C Production Management Branch

- review all requirements levied on DI
- develop and monitor production program that meets requirements of DIA consumers
- provide action officers for key production requirements and problems involving DI
